

Signal Hawk Pro – User Guide

Version: 2.0

Application: Signal Hawk Pro

1. System Requirements

Minimum Requirements

Windows 10 or Windows 11 (64-bit recommended)

MetaTrader 5 installed

Active internet connection

Valid SignalHawk subscription

Optional

Multiple MT5 accounts for account management

Telegram access for support and announcements

2. Installation

1. Download the SignalHawk Pro executable from the official source.
2. Place the application in a folder with read/write permissions.
3. Ensure MetaTrader 5 is installed and functioning correctly.
4. Launch SignalHawk Pro.

Security Notice

SignalHawk Pro contains built-in integrity protection.

If application files are modified, corrupted, or tampered with, the software may refuse to run for security reasons.

3. Subscription Activation

On first launch, the system will request your registered email address.

If no active subscription exists:

1. Payment instructions will be displayed.
2. Send payment using Airtel Money.
3. Enter the Airtel Transaction ID (TID).
4. The transaction is submitted for admin verification.
5. Once approved, the application unlocks automatically.

Airtel Payment Details

Number: 0748244415

Name: Semakula Sharif

4. Subscription Management

The subscription status bar displays:

Remaining subscription time

Approval status

Expiration status

Features

Real-time countdown timer

Automatic expiry detection

Automatic account lock when expired

Automatic unlock after renewal approval

When a subscription expires:

Trading stops automatically

Bot controls are disabled

Renewal instructions are displayed

5. MetaTrader 5 Login

Enter:

MT5 Login ID

MT5 Password

Broker Server

Click: Login.

After successful login:

Account credentials are encrypted locally

Auto-login is available on future launches

Login information can be synchronized to your cloud account

Security

Credentials are encrypted before storage and are never displayed in plain text.

6. Account Management

Select Manage Accounts to access saved trading accounts.

Features include:

Save multiple MT5 accounts

Load accounts instantly

Cloud account synchronization

Fast account switching

Automatic retrieval of previously saved accounts

7. Broker Hub

Click Broker Hub to access broker resources and trading services.

The Broker Hub provides:

Broker information

Trading resources

Additional services integrated into SignalHawk Pro

8. Symbol Selection

Supported trading instruments are grouped into categories.

Metals

XAUUSDm

XAUUSDm

Cryptocurrency

BTCUSDm

ETHUSDm

Forex

EURUSDm

GBPUSDm

EURJPYm

GBPJPYm

Indices

USTECm

USOILm

Controls

Select Symbols

Select All

Clear All

The selected instruments appear below the selection menu.

9. Trading Settings

Configure:

Scan Interval

Available options:

1 Minute

5 Minutes

15 Minutes

1 Hour

Maximum Active Symbols

Limits how many symbols can trade simultaneously.

1.00

10. Bot Controls

START BOT

Starts automated trading using selected settings.

Requirements:

Active subscription

Successful MT5 login

At least one selected symbol

STOP BOT

Immediately stops trading operations.

Toggle Dark/Light Mode

Switches between dark and light user interface themes.

Monitor Trades

Opens the Live Position Monitor window.

11. Live Position Monitor

The Position Monitor provides real-time visibility of all open trades.

Displayed information includes:

Ticket Number

Symbol

Buy/Sell Direction

Current Profit/Loss

Entry Price

Current Price

Stop Loss

Take Profit

Trade Management Actions

Close Selected

Closes the currently selected position.

Close Profitable

Closes all positions currently in profit.

Close Losing

Closes all losing positions.

Close All

Closes every open position.

Cooldown Protection

When a losing trade is manually closed, SignalHawk can apply a cooldown period to prevent immediate re-entry on that symbol.

12. Announcement System

SignalHawk includes a live announcement system.

Administrators can send:

Updates

Maintenance notices

Important alerts

Trading information

Announcements automatically appear inside the application.

Each announcement is shown only once per user.

13. Activity Monitoring

SignalHawk automatically reports:

Online status

Offline status

Last activity timestamp

This helps maintain accurate subscription and account status.

14. Logging System

The log panel records system activity in real time.

Examples include:

Login success

Subscription updates

Trade actions

Bot activity

Error notifications

Approval confirmations

Each log entry contains a timestamp.

15. Security Features

SignalHawk Pro includes:

Subscription Protection

Trading cannot start without a valid subscription.

Account Encryption

Stored MT5 credentials are encrypted.

Integrity Verification

Application tampering detection.

Secure Cloud Storage

Account synchronization through Firebase.

Automatic Access Locking

Expired subscriptions immediately disable trading functions.

16. Troubleshooting

"Subscription Required"

Your subscription is inactive, expired, or pending approval.

"Login Failed"

Verify:

MT5 Login ID

Password

Server Name

"Waiting for Admin Approval"

Your payment has been received but has not yet been approved.

"Offline"

Check your internet connection and firewall settings.

17. Risk Disclaimer

SignalHawk Pro is an automated trading assistant.

Trading financial instruments involves significant risk and may result in financial losses.

Past performance does not guarantee future results.

The developer and distributors of SignalHawk Pro are not responsible for losses incurred through the use of this software.

Use at your own risk.
